

CREATE A MONSTER

Skill level = a bit fiddly

You need:

Paper, glue, scissors and colouring-in stuff

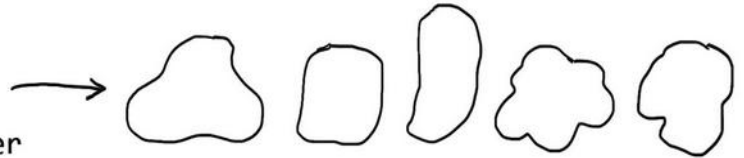

Draw a body shape on a piece of paper.
It can be any shape you like as long as you can add features to it.

Print out the next page or copy the monster body parts onto another piece of paper.

Carefully cut out the parts that you'd like to use and glue them to your shape.
Colour in and decorate.

You have now created your own monster and can give it a name!

Can you make it move The Big Red Rock?

Cut the body parts out roughly first to make it easier to cut round fiddly bits. Always take care when using scissors and ask an adult to help with the tricky bits!
